IC Chip Sets & Length

As a rule adding a IC chip will boost length performance of a cable. As a basic rule the below chart can apply. The length would be the total length of all cable in the chain from source to sink. Each connection would weaken the signal and reduce the overall length from that listed in the chart below.

	Standard Speed	Full High Speed
28AWG without IC	8M / 26ft.	5M / 15ft.
28AWG with IC	31M / 100ft.	13M / 40ft.
24AWG without IC	12M / 40ft.	8M / 25ft.
24AWG with IC	43.5M / 140ft.	19M / 62ft.
